

bonná  
2026

We manufacture premium-quality products with unique design and sustainable practices. Guided by our passion for gastronomy and our commitment to creativity and innovation, we are a genuine partner for HoReCa professional.

# sustainability

## save for tomorrow!

**Our Philosophy: Integration with Nature**  
**Our Goal: Save All the Values of Life for Tomorrow**

The moment when elements of soil merge with water to form a porcelain body marks the beginning of Bonna's products, bringing them to life and enhancing culinary experiences. Through this integration, energy resources shape the final appearance of each porcelain piece, transforming natural materials into a durable form. This process reflects a deep respect for the natural cycle, ensuring that even at the end of its lifecycle, porcelain continues to contribute positively to the environment.

Bonna's sustainability vision is rooted in preserving harmony between nature and production while meeting today's needs without compromising future generations. Guided by integrity and strong ethical values since its foundation, Bonna aligns its sustainability strategies with the United Nations Sustainable Development Goals, including Affordable and Clean Energy; Industry, Innovation, and Infrastructure; Responsible Consumption and Production; Climate Action; Life Below Water; Life on Land; Gender Equality; Reduced Inequalities; Peace, Justice, and Strong Institutions; and Partnerships for the Goals.

## Bonna Contributions to Net Zero Commitment

We measure and officially validate our carbon footprint annually according to ISO 14064 and GHG Protocol. Our commitments to Net Zero Movement are:

### Sustain Our Industry by Circularity and Long Product Life Cycle

- World's first Environmental Product Declaration Certification in Tableware and Kitchenware Category
- Recycled porcelain collection recovering 87% of internal wastes of the production cycle
- Zero Waste Production Facility by %99,9 recycle and recovery rate
- Industrial Wastewater Treatment System recover daily water used

### Sustain Our Life Resources by Low Carbon Emission

- Net Zero Warehouse supported by Solar Energy System and certified by LEED Gold. A total of 92.962 trees are saved and 5.113 tons of carbon emissions are prevented across all solar energy systems at our all facilities.
- Vitrified collections produced by single firing and local resources enable even lower carbon footprint offers

### Sustain Human Well-Being and Integrate with Society by Social Impact

- Information security management system guaranteed by ISO 27001 Certification
- Human resources policy in line with the United Nations Universal Declaration on Human Resources and International Labor Organization (ILO) standards
- Corporate Social Responsibility Policy supporting young chefs' education in the world's leading culinary schools and gastronomy departments

Design Awards

HONORABLE MENTION

WINNER

Each collection bearing the Bonna signature is meticulously designed to the highest quality standards, with a strong focus on originality, functionality, innovation, and ergonomics. Alongside Bonna's in-house design team, our collaborations with internationally renowned designers enable us to develop exclusive series tailored to the professional needs of the gastronomy sector. Through this approach, we aim to deliver excellence in every presentation. All collections undergo rigorous quality and durability testing

by our R&D team and are produced through a flawless manufacturing process before reaching professional kitchens. Today, Bonna serves gastronomy professionals in more than 100 countries across six continents. Our consecutive export leadership in Türkiye's "Porcelain, Tableware, and Kitchenware" sector stands as a clear reflection of this commitment. With dozens of award-winning collections, Bonna continues to provide refined and reliable solutions for the HoReCa industry.

# Specifications

## Lifetime Edge Chip Resistance Warranty

Selected plate forms feature edge-chip resistance, and those marked with the “edge-chip resistance logo” are backed by our lifetime warranty.

## Outstanding Durability

Our dense, special product formulation ensures outstanding durability, and our plates are fully compatible with industrial applications, exceeding industry standards.

## Stackable

We know how important space efficiency is in professional kitchens. That is why we design many of our products to be stackable, starting with our plates.

## Translucency

Our detailed R&D process gives a translucent, elegant ivory whiteness to our fine-dining restaurant plates.

## Microwave Safe

Our microwave-safe porcelain and Premium Vitrified products offer practical usage and save time.

## Unique Pieces Reactive Glaze

Thanks to reactive glaze technology, each piece has unique color transitions. This makes each plate special and unique.

## Scratch Resistance

Our state-of-the-art glazing technique offers superior scratch resistance. Our plates and cutlery collections deliver excellent performance together.

## Dishwasher Safe

High resistance glazing process enable Bonna products to be resistant to highly corrosive dishwasher effect during fast service cleaning cycle.

## Thermal Shock Resistance

Hard glaze surface and premium raw materials provide durability against sudden temperature changes.

## Genuine Partner

We regard our customers as partners and share their passion. Through superior product quality and customer-focused operational solutions, we deliver a perfect presentation experience.

**Dora & Clair**

# clair

by Antonio Bachour

*Clair is a presentation stand inspired by Chef Bachour's "picked from the branch" concept. Bonna's leaf-motif plates and the stainless-steel stand evoke a fruit-bearing tree, bringing poetic harmony and luxury to refined hospitality experiences.*

# last call

for selected products

Our portfolio continues to expand with innovative product designs and technologies that we develop day by day. In order to manage our product variety strategically and maintain portfolio balance, the collections on our "last call" list will be replaced by new products in our catalog as of 2027. Products in the "Last Call" category can be purchased throughout 2026 like main catalog products. As of January 1st 2027, the MOQ procedure and price difference conditions will take effect.

# customization

At Bonna, we offer custom solutions to help your business stand out and deliver memorable guest experiences. By applying your logo or custom-designed patterns to our premium porcelain and vitrified products, we turn every presentation into a powerful brand touchpoint.

# from idea to delivery

## Decal Application Process

We offer a smooth and efficient workflow for customized decal applications. Here are the key steps:

### · Submission of Design Files

High-resolution files of the logo or artwork to be applied must be provided. Logo designs should include a maximum of 4 colors, while rim (border) designs can include up to 6 colors.

### · Digital Design Preview

Our design team will share the digital file for first approval within 2 business days.

### · Sampling and Production

Once the design is approved, samples will be shipped within 1 week. Following sample approval, the final production process will begin, and your products will be manufactured and ready for shipment within 6–7 weeks.

\* For orders of 3,000 pieces or more, the delivery date may vary. Please consult your sales representative for further information.

# on glaze badge sizes

· Simplified examples of badge placement on Bonna products are shown in the visuals on this page.

· If you require a custom placement different from the standard examples, please contact your sales representative to create a tailored solution for your needs.

· Badge dimensions may vary depending on the design details. The measurements provided represent standard sizes.

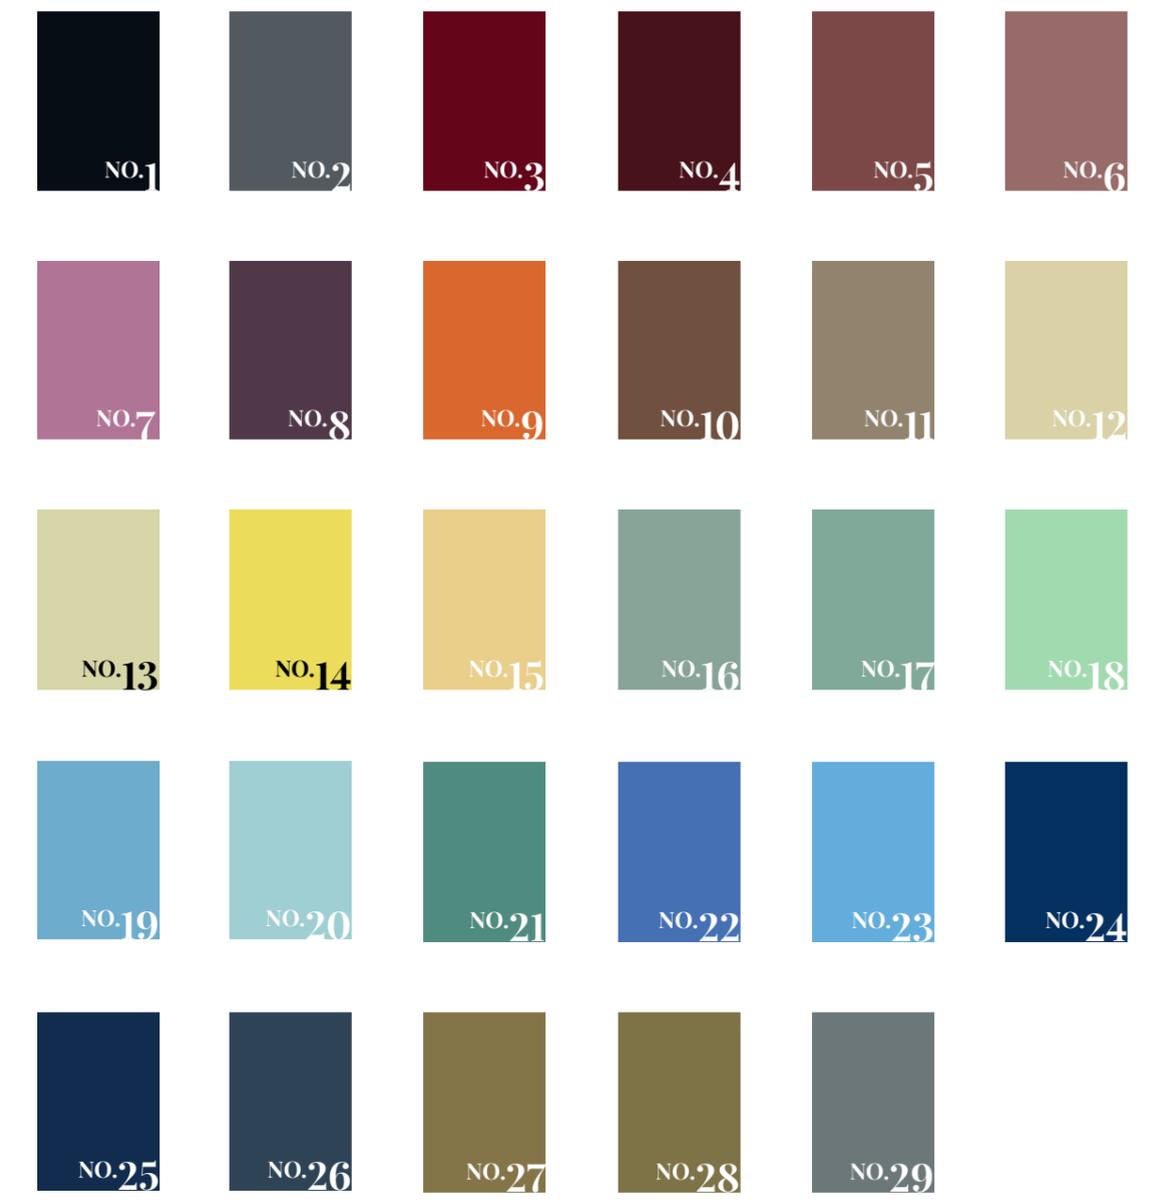

# badge & rim examples

The logo size may vary depending on the plate size to which the decal will be applied.

# color palette

29 standard color options

The colours shown in the catalogue may not accurately reflect the colours applied on the plate.

## porcelain & vitrified

- To protect the glazed surface of the products, stack them one by one without sliding, in a way that they will be stacked on top of each other at the contact points.
- It is recommended that the feet of the products should not come into direct contact with aluminum countertops and shelves. If there are aluminum countertops and shelves, it is advised to cover them with silicone coating.
- All Bonna Porcelain products, except those mentioned, are suitable for microwave use. Gilded, decaled, reactive with metal content, and porcelain with platinum content are not suitable for microwave use.
- Oven dishes, soufflés, and casseroles are suitable for oven use. They are heat-resistant up to a maximum of 220°C.
- When the products removed from the freezer or refrigerator reach room temperature, you can proceed with the heating process. As with all porcelain products, protect our items from sudden and high temperature differences.
- Our patterned, hand-decorated, and white products are suitable for use in the microwave oven.
- Check and ensure the quality of your cutlery set.
- Always wash Metal, Porcelain, and Glass products separately, both manually and in the dishwasher. This will prevent metal particles from sticking to the surface of the porcelain products.
- While washing the surfaces of porcelain products, the use of metal scrubbers or metal tongs is not recommended.
- To remove stubborn residues from the surface of porce-

- lain products, use a scrubbing pad and water. For stuck-on residues, you can clean with rubber scrapers, gloved hands, or a water spray.
- Do not hit the product against any surface to remove residues. Instead, follow the recommended cleaning methods to ensure the longevity and quality of your porcelain product.
- The hardness of your washing water can be very low. Have the manufacturer of your dishwasher check water hardness. Do not wash porcelain products with water under 4°dH. Adjust the required water hardness by contacting the manufacturer of your dishwasher.
- If the water hardness is higher than 6°dH, it is recommended to use salt. If it is lower than this degree, salt is not recommended. With water hardness level above 6°dH, adjust salt usage level according to the hardness ranges specified by the manufacturer of your dishwasher.”
- While soft water (0-3° dH) leads to corrosion (deterioration on the surface of the porcelain) problems, excessively hard water (6-10° dH) may leave residues that look like lime stains on the surface of porcelain products.”
- Using the dishwasher rinse aid and detergent in accordance with the dosing and programs determined by the dishwasher manufacturer will extend the lifespan of porcelain products. Excessive use can shorten the lifespan of porcelain products.
- Do not wash your products below 50°C and above 70°C.
- Do not use metal utensils like metal whisks with porcelain.

## wood

- Before using for the first time, scrub with saline water, wipe off in time, and leave to dry. For daily maintenance, it can be wiped with olive oil.
- The surface of the wooden board can be damaged when knocked with harder materials.
- Solid wood boards have natural surface textures; therefore, they may differ in their appearances.
- Avoid soaking the wooden board for too long. To prevent bacteria growth, wash and dry it in time.
- Vegetables, meat, fruit, and other food materials can be easily processed on the wooden board. However, avoid too much chopping of hard food materials such as bones to prevent the wooden board from being damaged.
- It is not advised to leave wooden products in damp places for a long time.
- Avoid exposing wood materials to the sun for a long time. Increased loss of moisture could lead to wood cracking.
- It is recommended to use a soft cloth when cleaning. Never use metal wire for cleaning.
- You can wipe the surface with olive oil to extend the useful life of wood products and remove knife traces.

## cutlery

PVD (Physical Vapor Deposition) cutlery features a titanium coating with a vibrant color. This cutlery is dishwasher proof when taking into account our instructions. For colored-PVD cutlery (gold/rose), our care instructions are a little different than for standart stainless steel cutlery, to help you to keep your cutlery as vivid in color longer.

### Carefully hand wash your cutlery before first use.

Handwashing remains preferable and is advised to maintain the shine. Avoid scouring pads, bleach detergents and the use of sodium. Rinse food residue promptly or wash your cutlery directly after using, prolonged exposure to salts and food acids causes damage. Don't leave your cutlery soaking. After washing, dry straightaway with a soft cloth.

### Dishwashing

Dishwashing is possible when taking into account the following instructions:

- When using the dishwasher, avoid aggressive detergents may damage your cutlery, use gentle detergents with a phosphate level below 3% and avoid sodium.
- We recommend to use dishwashing programs with a low temperature of 40°C or less.
- Check if your dishwasher features an eco-friendly program, most of these programs offer a low temperature of 40°C or less.
- Rinse food residue promptly before putting the pieces in the dishwasher, prolonged exposure to salts and food acids (e.g. mayonnaise, vinegar, mustard) causes damage.
- Do not wash your cutlery in contact with cutlery, knives or utensils of a lower steel quality as chemical reactions will mark the steel.
- Remove the pieces from the dishwasher when the cycle is finished and towel dry your cutlery to prevent spotting.
- Don't leave your cutlery to cool. Remove any water spots with a soft cloth to keep its shine.

## infinityglass

### 1. Product Description:

Our Polycarbonate glasses are specifically crafted for the Horeca sector, offering exceptional quality, durability, and elegance. They are the perfect choice for professional use in hotels, restaurants, and catering services.

### 2. Important Safety Instructions:

- Avoid contact with sharp objects to prevent scratches.
- Do not use aggressive cleaning agents or abrasives to avoid damaging the glass surface.
- Polycarbonate glasses are not suitable for use in the microwave.

### 3. Cleaning and Maintenance:

#### a. Dishwasher:

- Place the glasses in the upper rack of the dishwasher to avoid direct contact with other dishes.
  - Use mild dishwashing detergent and set the dishwasher to a low temperature for extended glass lifespan.
  - Remove glasses promptly after the wash cycle to prevent condensation.
- #### b. Handwashing:
- Use warm water and mild dishwashing detergent.
  - Clean glasses with a soft sponge or cloth.
  - Rinse glasses thoroughly to remove all residues.

### 4. Drying:

- Dry the glasses immediately after washing to prevent mineral deposits.
- Use a soft cloth or let the glasses air dry.

### 5. Storage:

- Store glasses in a cool, dry place to prevent discoloration or deformation.
- Stack glasses carefully to avoid scratches.

### 6. Tips for Use:

- Avoid using sharp ice or other hard objects to prevent damage.
- Minimize contact with extremely hot liquids to prevent deformation.
- Adhere to recommended usage temperatures.

### 7. Technical Specifications:

- Temperature Resistance: Suitable for use in temperatures ranging from -40°C to 80°C (-40°F to 176°F).
  - Impact Resistance: Resistant to impact and breakage under normal use conditions.
  - Chemical Resistance: Designed to withstand exposure to mild detergents and cleaning agents.
- Thank you for choosing our Polycarbonate glasses. We wish you successful use and remain at your disposal for any further assistance.

## solida

- Before first use, ensure that you thoroughly wash the items using warm soapy water and a sponge scourer.
- Whilst the product is dishwasher safe, to help prolong the life of the product, we recommend to hand wash with warm soapy water after every use.
- We recommend that immediately, or as soon as possible after use, the product should be hand washed to remove excess foodstuffs as they contain salts, acids and fats which may cause corrosion.
- Once cleaned, the product should be dried immediately to avoid prolonged contact with water or moisture which can cause corrosion or rusting.

### Do Not

- Do not use the product over direct heat/flame
- Do not scrub the vintage steel surface or brass handle with an abrasive sponge
- Do not use industrial detergent on the vintage steel surface or brass handles
- Do not leave the product wet as permanent water may stain the surface

Please be aware the brass handles will naturally tarnish over a period of time
